From our release yesterday:

"The Gold King Mine is releasing water at the rate of approximately 600 gallons per minute. Water continues to be treated at a series of settling ponds before being discharged to Cement Creek"

Subject: New York Times — DEADLINE TODAY — Gold King Flow Rate

Hi all,

I am following up on the emails I sent last week —

I am looking for the current wastewater flow rate out of the Gold King Mine.

Can you please provide this today, as soon as possible? My story will run tomorrow. If not, I will have to write in the New York Times that the E.P.A. would not share this basic piece of information with the public.

The AP reports that the flow rate is 213 gallons/min.

Can you confirm?

Thank you.
Julie
